# RIEDL PHARMACY AUTOMATION SYSTEM GPI, NEW ORDER IN SOUTH AFRICA

Trento - September 21, 2020

**GPI Group (GPI:IM)** gets a new order of its solution for drugs automation and logistics. In August, the company signed an agreement with E-RX Ltd, a South African company, for the supply of two Riedl Phasys systems, whose total value exceeds 500,000 Euros.

The system purchased by E-RX Ltd is made up of two automated warehouses that are connected and work as a single 15-meter-long robot, thanks to an external line for basket refilling and displacement. In addition to those two robots, there is a third one having similar dimensions and connected to the same conveyor belt, which has been specifically designed in order to be placed inside a refrigerating room. Three systems, that is three robots working together as a single one to meet at best the needs of the customer, in this case a wholesaler. The double system itself is worth 396,000 Euros, while the one that will be installed inside the refrigerating room is worth 118,000 Euros.

The basket refilling system consists in automatic conveyor belts (roller conveyors), a technological solution, which GPI Automation BU has already sold to an important customer in Qatar, Ebn Sina Medical.

# **GPI GROUP**

Gpi is the partner of reference for software, technologies and services dedicated to health care, social care and public administration. Founded over 30 years ago in Trento, Italy, GPI has grown thanks to significant investments in M&A (in Italy and abroad) and R&D, carried out in partnership with the main Italian universities and research organizations with the aim of transferring scientific, technological, functional and process know-how applied to the e-health, e-welfare, well-being sectors. Thanks also to the solutions and the specialised expertise passed on from companies who became part of the Gpi ecosystem, the Group has managed to translate emerging needs from health care into cutting-edge technological solutions and new service models capable of optimizing prevention processes, diagnosis and treatment, improving people's quality of life.

The products combine specialist expertise in IT and consultancy and design skills, which allow Gpi to operate in different business areas: Software, Care, Automation, ICT and Pay.

In 2019 the Company delivered consolidated revenues of 241 million Euros, over 5,300 employees and more than 2,200 customers spread over 60 countries.

In 2016 Gpi was listed on Borsa Italiana AIM market and graduated to MTA market in 2018. ISIN common shares: IT0005221517 - ISIN "Warrant GPI SpA": IT0005221475
