

BLOOD MANAGEMENT SYSTEM GPI IS AWARDED THE TENDER OF THE SOFTWARE TO GREEK HOSPITALS

Trento, 31 May 2022

A new important sale of its Blood Management System by the Gpi Group, which won a 1.8 million Euro tender in Greece for the provision of the e-Delphyn transfusion software of Gpi Iberia to about 120 hospitals in the country. The project will last 20 months, with an additional 4-year service.

This is a very important achievement for the Gpi Group as well as for the transfusion sector, which acknowledges the constant expansion in new markets in Europe and worldwide.

The Blood Management System of the Gpi Group is represented by the single brand GPI4Blood, whose strength is the ability to offer a full package of solutions able to meet any specific need of the client linked to transfusion as well as to support their future development goals thanks to its continuous system and technological innovation.

GPI4Blood is a solution provider, which embodies both the product and domain competences. Therefore GPI4Blood is able to offer tailored solutions based on the constant dialogue with doctors and medical staff, thus representing an added value to the only role of software provider.
