

## GPI WON THE TENDER TO IMPLEMENT THE ELECTRONIC MEDICAL RECORDS SYSTEM FOR ALL OF LOMBARDY

**€ 32.7 million for the consortium led by GPI**

Trento, 16 January 2023

**GPI S.p.A. (GPI:IM)**, a leading provider of information systems and services for health and social care listed on the EXM market, announces that the consortium it leads has been awarded the contract to implement the **Electronic Medical Records System for the Lombardy Region**.

Under the **€ 32.7-million** contract, it is to supply an application solution for the system based on a single technology platform extended to all **19 health authorities** in the Lombardy Region. The overall term of the contract is **four years**: the first year will involve analysis, development, testing and trials, including training and start-up for the first group of 14 health authorities, whereas the remaining five health authorities are to be brought on line in the second year. This will be followed by the full-scale operation of the solution after start-up. **Gpi's 38% share is worth approximately € 12.4 million.**

The contract awarded by the Lombardy Region is part of the restricted tender programme under the Consip Framework Agreement on "*Digital Health – Clinical and Healthcare Information Systems*" (funding limit of € 900 million – see GPI press releases of [25/11/2021](#) and of [26/04/2022](#)) and will draw on the resources provided by the NRRP's Mission 6 Health.

The deployment of the electronic medical records system in all regional hospital facilities through a **single, extended and integrated technology platform** is a **strategic element** in achieving the digitalisation goals set in the NRRP. In fact, digitalisation is intended to increase regional health information assets, so as to support the standardisation of hospital processes at inter-agency level and to encourage the adoption of best practices. Digitalisation also increases the level of safety of hospital processes and thus reduces risks for patients. In addition, the quality of services is improved and major hospital clinical processes are optimised. The integration of treatment and care pathways between hospitals and local providers is facilitated through the structured exchange of data between the various organisations. Finally, complete traceability of the operations is ensured, thus increasing transparency and the protection of patients' health and safety.

"The award of this contract is cause for great satisfaction in the light of the value attributed to the proposal submitted, which includes high-tech solutions and the ability to implement projects of great size and complexity," commented **Fausto Manzana, CEO of the Gpi Group**. "This is one of the most important tenders in the field of solutions for the digital transformation of the Lombardy health system – a strategic asset for implementing the projects envisaged in Mission 6 Health of the NRRP. For the Gpi Group, it is an important step in our growth process, in line with the provisions of our Strategic Business Plan."

## GRUPPO GPI

Gpi è il partner di riferimento per il software, le tecnologie e i servizi dedicati alla Sanità, al Sociale e alla Pubblica Amministrazione. Nata oltre 30 anni fa a Trento, Gpi è cresciuta grazie a significativi investimenti in M&A (in Italia e all'estero) e in R&S, svolta in partnership con le principali università e centri di ricerca italiani con l'obiettivo di trasferire le conoscenze scientifiche, tecnologiche, funzionali e di processo applicate ai settori e-health, e-welfare, well-being.

Grazie anche alle soluzioni e alle competenze acquisite dalle società entrate a far parte del suo ecosistema, il Gruppo è riuscito a tradurre le necessità emergenti dal mondo sanitario in soluzioni tecnologiche all'avanguardia e in nuovi modelli di servizio in grado di ottimizzare i processi di prevenzione, diagnosi e cura, migliorando la qualità della vita delle persone.

L'offerta combina competenze specialistiche in ambito IT e capacità di consulenza e progettazione che consentono di operare in differenti aree di business: Software, Care, Automation, ICT e Pay.

La Società ha chiuso il 2021 con ricavi consolidati pari a 326,9 mln di Euro, oltre 7.200 dipendenti e più di 2.500 clienti distribuiti in oltre 70 paesi.

Gpi ha fatto il suo ingresso in Borsa Italiana nel 2016 (segmento AIM) ed è passata sul mercato MTA (ora EXM) nel 2018.
