

## GPI WINS TENDER FOR PATHOLOGICAL ANATOMY SOFTWARE FOR VENETO

### Goal achieved thanks to acquisition of TESI Group, fundamental factor to targeting market segments previously inaccessible to GPI

Trento, 30 January 2023

**GPI S.p.A. (GPI:IM)**, a leading information systems and health and social care services company listed on the EXM market, announces that it has been awarded the tender to implement the **digital Pathological Anatomy (PA) solution** for the **Veneto Region** Health Authority.

The contract is worth **€5.9 million**, has a term of four years and involves providing the PA software to all departments and services of the Veneto Region's Health Authority. The PA software will be used in daily clinical and scientific activities and will handle over 2.5 million histological slides a year.

Under the internal agreements within the consortium through which Gpi is participating in the Consip Framework Agreement, almost the entire amount will be attributed to Gpi.

Leveraging the cross-selling potential resulting from the recent acquisition of a majority interest in the Tesi Group, Gpi will draw on **the capabilities of the information system designed and developed by Tesi**, featuring state-of-the-art web technology, to manage **the entire traceability process** of PA laboratories, from sample acceptance to assisted reporting.

The contract also includes a system for storing **virtualised histology slide images** and a dedicated image viewer. The solution provided will interface with laboratory instrumentation and will be integrated with the Electronic Health Record.

A business intelligence dashboard will also be implemented to carry out productivity and diagnostic quality surveys. In terms of innovation, several artificial intelligence algorithms will be implemented to improve diagnosis through the evaluation of biopsies and predictive prognostic biomarkers.

The contract awarded by the Veneto Region, like that recently announced for the Electronic Patient Record for Lombardy, is part of the restricted tender programme under the Consip Framework Agreement on "Digital Health – Clinical and Healthcare Information Systems" (funding limit of €900 million – see Gpi press releases of [25/11/2021](#) and of [26/04/2022](#)) and will draw on the resources provided by the NRRP's Mission 6 Health.

## GRUPPO GPI

GPI is the preferred partner for software, technologies and services for healthcare, social services and the public administration. Founded more than 30 years ago in Trento, GPI has grown through significant investments in M&A (in Italy and abroad) and R&D, which it carries out in partnership with leading Italian research centres and universities to share scientific, technological, functional and process knowledge applied to the e-health, e-welfare, well-being sectors.

Also drawing on the solutions and know-how gained from the companies that have joined its ecosystem, the Group has masterfully translated the needs of the healthcare industry into cutting-edge high-tech solutions and new service models that optimise prevention, diagnosis and care processes, improving people's lives.

The offer combines specialised IT expertise with advisory and design capabilities enabling it to operate in a range of business areas: Software, Care, Automation, ICT and Payment services.

The Company reported consolidated revenues of €326.9 million in 2021, with over 7,200 employees at year end and more than 2,500 customers in over 70 countries.

GPI was listed on Borsa Italiana in 2016 (AIM segment) and moved to the MTA (now EXM) market in 2018.
