PRESS RELEASE

AI VOICE ANALYSIS TO DIAGNOSE DISEASES: MIMIT PROVIDES 2 MILLION IN FUNDING FOR PROJECT COORDINATED BY GPI

Trento, 7 March 2024

The Ministry of Enterprise and Made in Italy (MIMIT) recently published the Grant Decree for funding for TALIA, a research and development project coordinated by Gpi in partnership with the University of Macerata, Turin Polytechnic and the University of Verona.

The project aims to **develop artificial intelligence agents integrated into virtual care applications** to aid in early diagnosis and assessment of various diseases based on voice analysis.

The TALIA project will have a duration of 36 months and a total eligible cost of € 5.8 million. MIMIT's contribution is € 2 million, of which € 1.1 million is allocated to Gpi.

The newly developed technologies will improve the diagnostic effectiveness and monitoring of patients' conditions through the use of intelligent voice biomarkers. The advanced data processing capabilities of artificial intelligence will be used to detect signals in the voice indicative of neurodegenerative diseases, cardiovascular diseases and emotional health. This is a field of research where the Gpi Group has been widely hailed as a pioneer in such studies, which have already yielded promising results.

Collaboration with the universities involved is indispensable to a multidisciplinary approach that favours the technological transfer of scientific expertise into industrial applications available in future clinical practice. The need for increasingly complex treatments requires access to innovative, safe therapies to improve patients' quality of life.

GPI GROUP

Gpi's mission is to make the healthcare systems sustainable through their digitisation, so that everyone can receive high-quality care.

Sustainability and social impact are the guiding principles and play a crucial role in the strategic and investment assessments of the Group, aware that the solutions and services provided to the community have an impact on the quality of life of individuals.

For 35 years, driven by a patient-centric vision, Gpi has been working to support healthcare systems by providing the skills and innovative tools necessary to improve prevention and treatment processes. This is achieved through the strategic use of advanced software, technologies, and cutting-edge services.

The Group's strategy is designed to meet the evolving requirements of the constantly changing healthcare sector and to facilitate entry into international markets.

The unwavering commitment of its 7,000 employees and a customer base of more than 3,000 across 70 countries, yielded €360 million in revenue, an EBITDA of €54 million in 2022.

Gpi S.p.A. is listed on the Euronext Tech Leaders segment of Borsa Italiana, the Italian stock exchange.
